

Never doubt what small can do.
Big things come from small beginnings. Everything
groundbreaking or world-changing starts this way.

The kids we help may seem small, but they face huge
challenges. A sample of cells in a petri dish is small,
but it could be the key to the next big breakthrough.

You might think your impact is small, but your
support could be just what we need to push the next
medical advancement over the finish line.

Together, we'll show the world:

Small is
MIGHTY.
