Logos

Logo basics. The Versent logo has two basic forms: Both versions of the logo can be used to represent Versent, but context should dictate which logo is a better choice;

1. The V mark is the main logo used throughout most of the Versent brand. It's our mark of authenticity. It's unique and striking and can increasingly stand alone with its' ever-growing brand awareness.

2. The Wordmark is our more formal logo and should be used to communicate the full name of the company to people who may not be familiar with Versent.

V MARK

WORDMARK

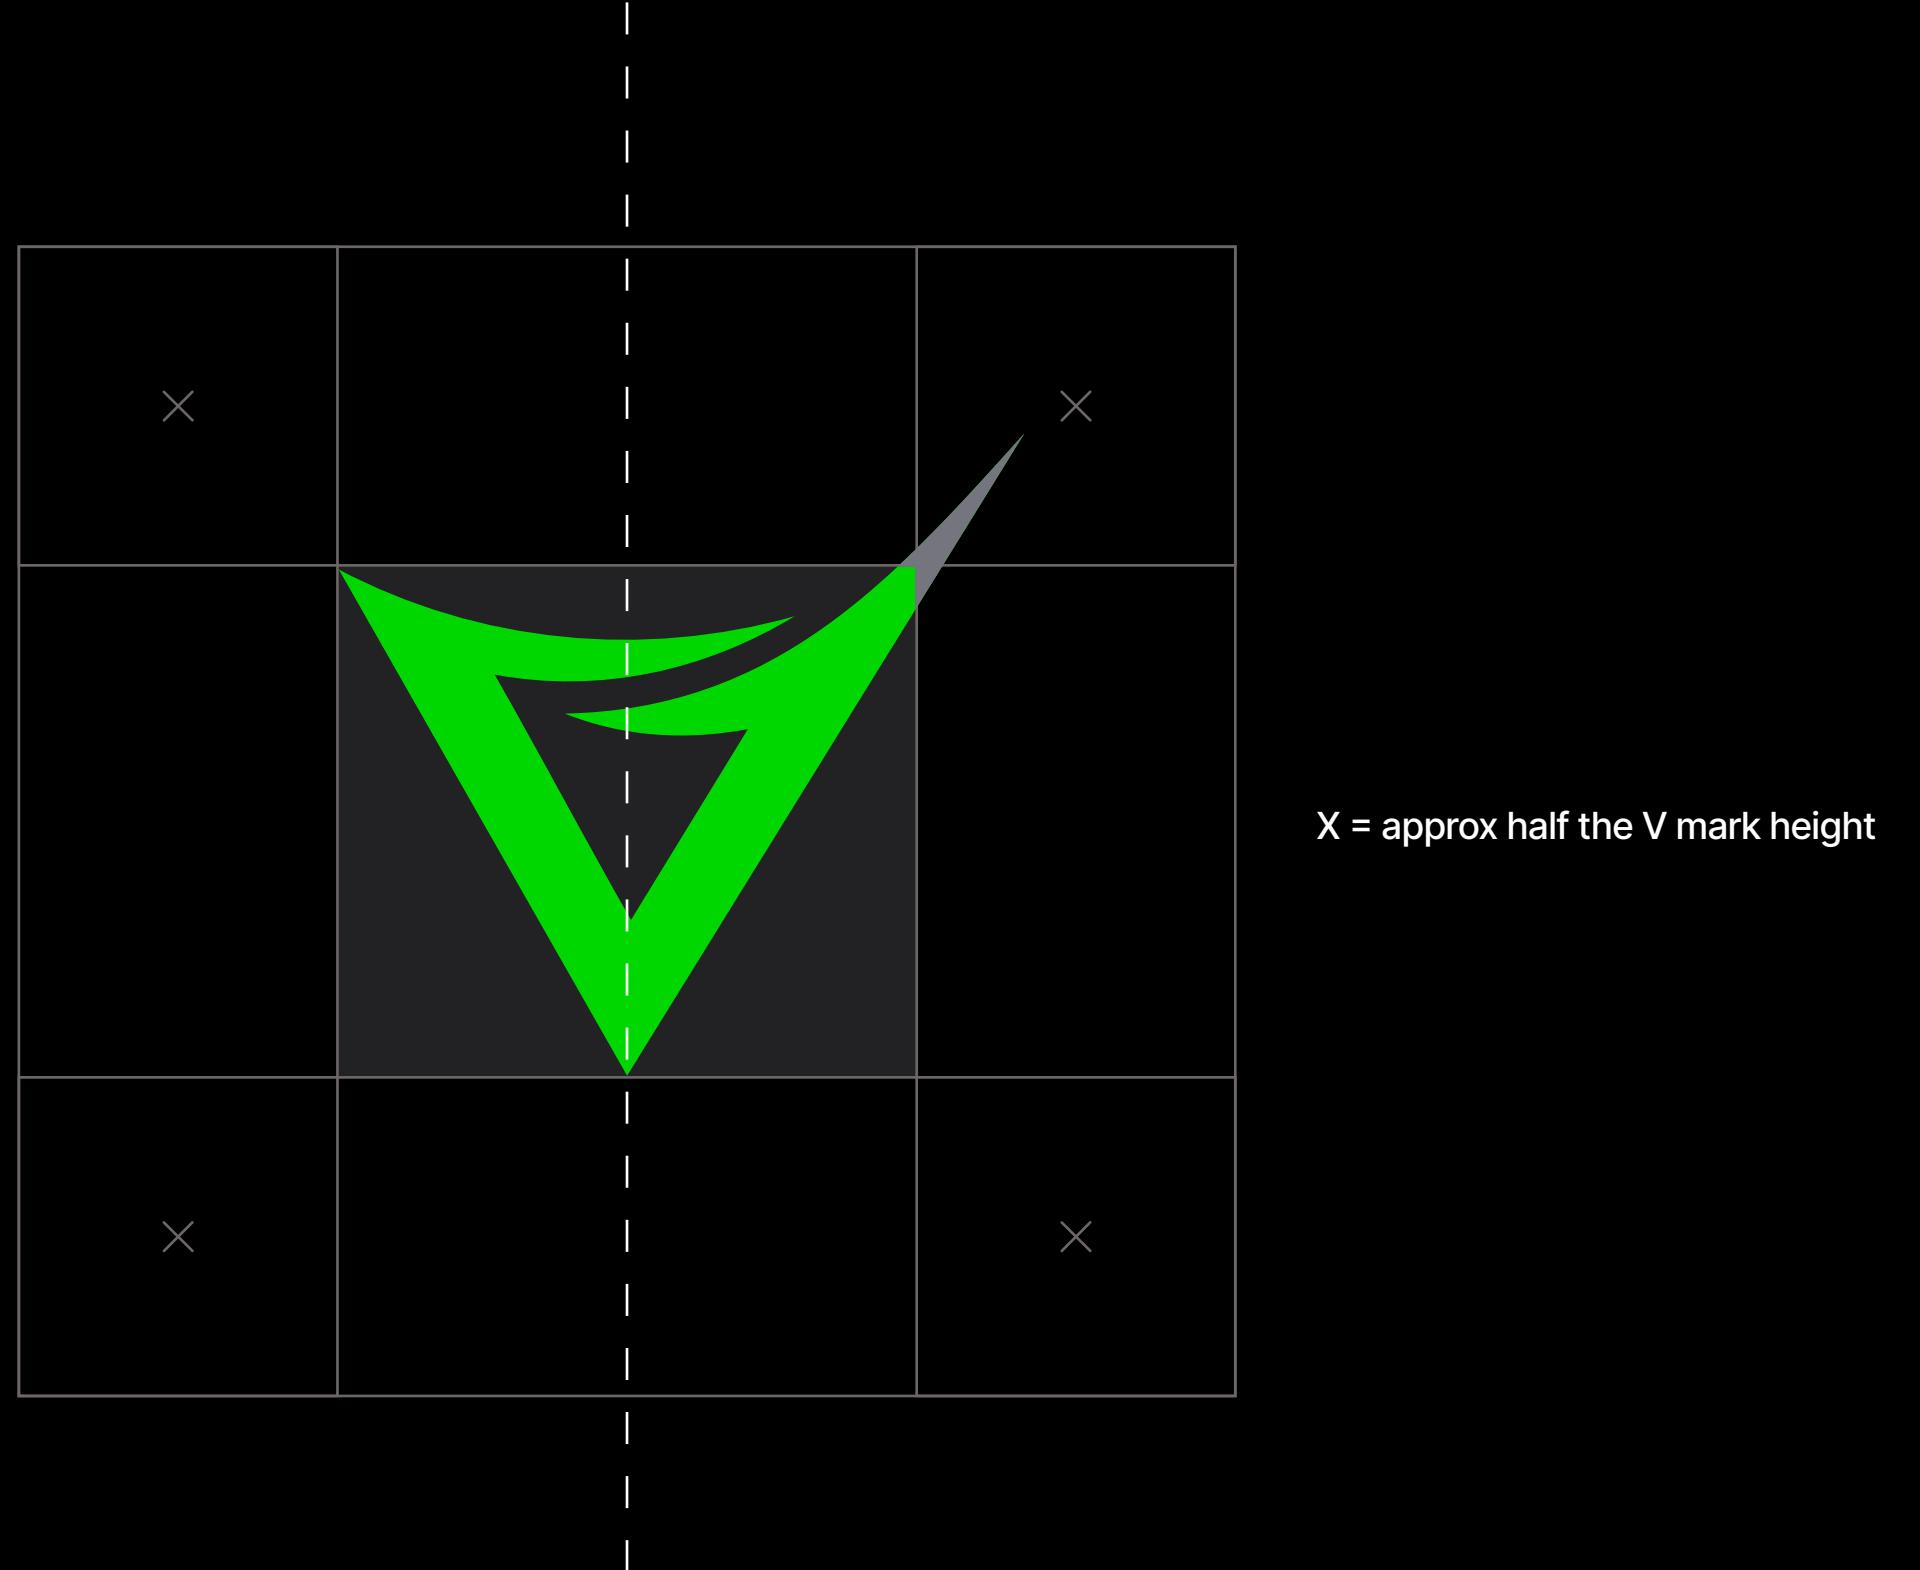

V mark clear-space and alignment.
When using our V mark on its own,
maintaining proper spatial margins
strengthens its impact and reflects the
brand's confidence and integrity

CORRECT ALIGNMENT

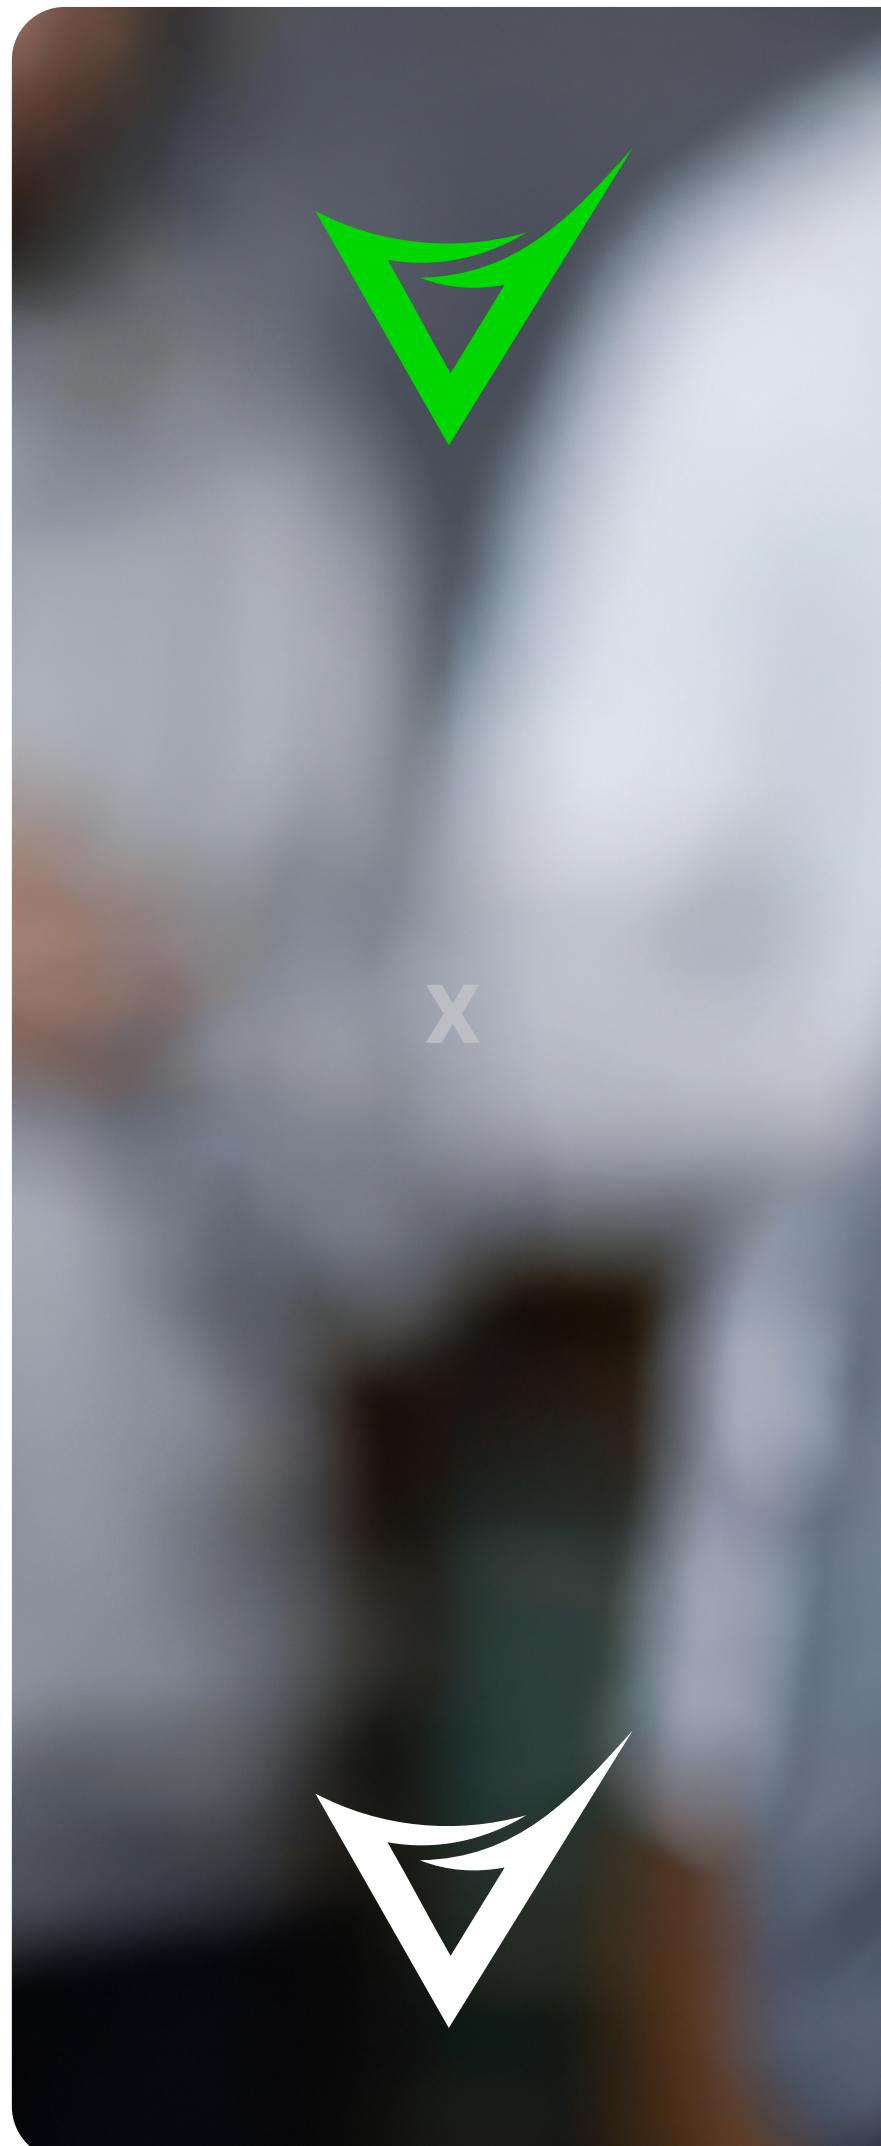

To find the centre of the V mark, draw a square from the left point horizontally across and then down to the bottom point. This will locate the centre, with some overflow of the top right corner of the mark being observed.

CORRECT CENTRE OF THE V MARK IS THE BOTTOM TIP

Wordmark clear-space. When using the wordmark it's important to ensure a generous margin to allow the logo strong presence where it lives.

The middle of the wordmark is tracked by the centre of the letters E.

Variants. We have four variants for our Wordmark. Our primary options are white with green V mark and black with green V mark. Our secondary options are all white and black versions.
